### Summary of qualifications

Full stack web developer with more than 20 years' experience. Strong team leader with extensive management and training background. Implementing software development life cycle policies and procedures. Can learn new concepts and technologies quickly.

### Projects and professional experience

#### Salut. Contract, Alicante, Spain

**01.2023 – Now, Full Stack Engineer +**

**Daxx - by Grid Dynamics, Kharkiv, Ukraine**

**04.2021 – 01.01.2023, Software Engineer, Full-stack programmer**

Project: "Salut" Healthcare lifestyle platform

Technologies: ASP.NET Core, ReactJS, React Native, MS Azure, MongoDB.

Role: Full-stack developer.

Responsibilities: Design and implement web and mobile applications with backend services. Application CI/CD and release procedures. Backend services conceptual design and legacy Web API refactoring.

As a full stack developer, I implemented 10+ web API services with communication in between using request-response and async pub-sub architecture, created admin panels for whole backend stuff and implemented mobile app frontend using React Native. Developed a system for creating and distributing content to mobile applications. Created an orchestration system for Web API invocations. Implemented OpenID authorization on a mobile device using React Native. Developed a UI and data library of web components using React.

Some recent work is here: <https://devatk11.com/#portfolio>

#### Vilmate, Kharkiv, Ukraine

**02.2019 – 04.2021, Software Engineer, Server-Side Programmer, Team Leader**
